Cooperative learning falls under the umbrella of work-integrated learning (alongside internships, service learning and clinical placements) but is distinct as it alternates a school term with a work term in a structured manner, involves a partnership between the academic institution and the employer, and generally is both paid and intended to advance the education of the student. University of ...

Deep learning networks have been trained to recognize speech, caption photographs, and translate text between languages at high levels of performance. Although applications of deep learning networks to real-world problems have become ubiquitous, our understanding of why they are so effective is lacking. These empirical results should not be possible according to sample complexity in statistics ...

My learning as an URP did not stop once I left my lab for the day. My fellow URPs were the most engaged, inquisitive, and knowledgeable group of students I have ever been lucky enough to be a part of. We spent many meals and nights talking about science/math (often over a game of Catan)—about each other’s projects, cool recently published papers, or weird debates such as the one over ...
