So the 100W rated globe above needs to run for 10 hours to use 1kw of power. If the company charges 20 cents per kWh then that 100w globe costs you 20 cents to run for 10 hours, 10 cents for 5 hours etc. But a 1000W globe would cost 20 cents for 1 hour (as it draws 10x the power), 10 cents for half and hour etc. Cheers. By Jimmy on 5th May 2020

A figurine of wondrous power is a statuette of a beast small enough to fit in a pocket. If you use an action to speak the command word and throw the figurine to a point on the ground within 60 feet of you, the figurine becomes a living creature. If the space where the creature would appear is occupied by other creatures or objects, or if there isn ' t enough space for the creature, the ...

Informal logic is " informal " insofar as it studies arguments as they occur in natural language discourse rather than formal languages of the sort that characterize propositional logic, the predicate calculus, modal logic, etc. (languages which have rigorously specified syntax, semantics and grammar, and clearly defined proof procedures). This is an important point but it does not negate ...
